

Hello 2H,

Here are your tasks to keep you busy. I will be checking on Spelling/Maths Shed and TT Rock stars daily.

**English**- You must read as usual. You also have your spelling shed account to practice spellings. I have put all the year 1 and year 2 common exception words onto spelling shed-children must be able to spell these words.

**Maths**- TT Rock stars daily. Maths Shed daily. Maths SATs practice paper to work through or addition and subtraction questions.

**Topic:** Our topic next half term is Ocean Commotion. You need to research how many oceans there are and the names of these oceans.

We will also be finding out about different sea creatures like sharks. You are to choose a sea creature and research information about this sea creature.

- What do they look like?
- What oceans would you find them in?
- What do they eat?
- How do they look after their young?
- Are they a predator or do they need to be careful of predators?

You are then to complete a poster showing the information you now know about the sea creature you choose. I want to see some writing and a creative piece. You can produce some artwork or make something. I will look forward to seeing what you make.

**Science:** Our next topic is plants. What can you find out about plants? What do they need in order to survive? This will be a poster competition.

Take care and we look forward to seeing the wonderful work that you produce.

See you soon.

Miss Holme and Mrs Lynch
